UNIT 10: ENERGY

PART I: THEORY

Created by: Mr Thanh (0369904425)

A. VOCABULARY

New words (Từ mới)

Words	Type	Pronunciation	Meaning
energy	(n)	/ˈenədʒi/	năng lượng
source	(n)	/sɔːs/	nguồn
energy sources		/ˈenədʒi sɔːsɪz/	các nguồn năng lượng
power	(n)	/ˈpaʊə(r)/	công suất, năng lượng
heat	(n)	/hiːt/	nhiệt
electricity	(n)	/ɪˌlekˈtrɪsəti/	điện
light	(n)	/laɪt/	ánh sáng
light bulb		/laɪt bʌlb/	bóng đèn
solar	(adj)	/ˈsəʊlə(r)/	liên quan đến mặt trời
solar energy		/ˈsəʊlə(r) ˈenədʒi/	năng lượng mặt trời
solar panel		/ˈsəʊlə(r) ˈpænl/	tấm quang năng, tấm pin năng lượng mặt trời
nuclear	(adj)	/ˈnjuːkliə(r)/	thuộc về hạt nhân
nuclear energy		/ˈnjuːkliə(r) ˈenədʒi/	năng lượng hạt nhân
wind	(n)	/wɪnd/	gió
wind energy		/wɪnd ˈenədʒi/	năng lượng gió
hydro	(adj)	/ˈhaɪdrəʊ/	liên quan đến nước
hydro energy		/ˈhaɪdrəʊ ˈenədʒi/	năng lượng nước
coal	(n)	/kəʊl/	than
oil	(n)	/ɔɪl/	dầu
gas	(n)	/gæs/	khí
natural gas		/ˈnætʃrəl gæs/	khí tự nhiên
produce	(v)	/prəˈdjuːs/	sản xuất
recycle	(v)	/ˌriːˈsaɪkl/	tái chế
reduce	(v)	/rɪˈdjuːs/	giảm
replace	(v)	/rɪˈpleɪs/	thay thế
reuse	(v)	/ˌriːˈjuːz/	sử dụng lại, tái sử dụng
renewable	(adj)	/rɪˈnjuːəbl/	có thể tái tạo
non-renewable	(adj)	/ˌnɒn rɪˈnjuːəbl/	không thể tái tạo
available	(adj)	/əˈveɪləbl/	có sẵn
limited	(adj)	/ˈlɪmɪtɪd/	có giới hạn, bị hạn chế
overcool	(adj)	/ˈəʊvəkuːl/	quá mát
overheat	(adj)	/ˌəʊvəˈhiːt/	quá nóng, quá nhiệt
warm	(v)	/wɔːm/	làm cho ấm lên
run out		/rʌn aʊt/	hết, cạn kiệt
cheap	(adj)	/tʃiːp/	rẻ
expensive	(adj)	/ɪkˈspensɪv/	đắt
save	(v)	/seɪv/	tiết kiệm

protect	(v)	/prəˈtekt/	bảo vệ

Word formation (Từ loại)

Words	Meaning	Related words	
available (adj)	sẵn có	unavailability (n)	
electricity (n)	điện năng	electrician (n)	electric (adj)
		electrical (adj)	electric (n)
energy (n)	năng lượng	energize (v)	energetic (adj)
		energetically (adv)	
limited (adj)	bị hạn chế, có giới hạn	limit (v)	limitation (n)
		unlimited (adj)	
produce (v)	sản xuất	produce (n)	producer (n)
		product (n)	
reduce (v)	giảm	reduction (n)	reductive (adj)
renewable (adj)	có thể tái tạo	renew (v)	non-renewable (adj)
replace (v)	thay thế	replaceable (adj)	replacement (n)
warm (v)	làm cho ấm lên, nóng lên	warm (adj)	warmth (n)

B. GRAMMAR

I. Present continuous tense (Thì hiện tại tiếp diễn)

Cách dùng

Cách dùng	Dùng để diễn tả hành động, sự việc đang xảy ra tại thời điểm hiện tại. **Ex 1:** Where's your mom? She**'s having** a bath. **Ex 2:** What are you doing now? I **am cooking**.
	Dùng để diễn tả những sự việc xảy ra trong khoảng thời gian gần lúc nói nhưng không nhất thiết là ngay tại thời điểm nói. **Ex 1:** They **are working** hard to finish their new project. (Họ đang làm việc chăm chỉ để hoàn thành dự án mới của họ **Ex 2:** Scientists **are looking** for new medicine to cure lung cancer. (Các nhà khoa học đang tìm kiếm loại thuốc mới để chữa khỏi bệnh ung thư phổi.)
	Dùng để diễn tả những việc đã sắp xếp để thực hiện, có dự định trước (thường mang tính cá nhân) và trong câu có phó từ chỉ thời gian đi kèm. **Ex 1:** A: What are you doing on Saturday evening? (Cậu sẽ làm gì vào tối thứ Bảy?) B: I **am going** to the cinema. (Tớ sẽ tới rạp chiếu phim.)

Created by: Mr Thanh (0369904425)

Dạng thức của thì hiện tiếp diễn

(+)	**S + is/ am/ are + V-$_{ing}$**
(-)	**S + is/ am/ are + not + V-$_{ing}$**
(?)	**Is/Am/Are + S + V-$_{ing}$?** **Câu trả lời** **Yes,** S + is/ am/ are. **No,** S + is/ am/ are + **not** **Câu hỏi Wh/ H** **Wh/ H + is/ am/ are + S + V-$_{ing}$?**

Dấu hiệu nhận biết

Thì hiện tại tiếp diễn thường dùng với các từ/cụm từ chỉ thời gian như:

- Now, right now, at the moment (lúc này)
- At present (hiện nay)
- At this time
- Listen! / Look!
- Keep silent! - Be quiet!
- Don't make noise! = Don't talk in class!
- Today/this day/this Monday ...
- Dùng với "always" để diễn tả lời phàn nàn.
  Ex: My son **is always messing** up the kitchen!

Cách thêm -ing vào sau động từ

- Động từ kết thúc bằng "e" thì bỏ "e" thêm "-ing"

give ➔ giving **argue** ➔ arguing
gaze ➔ gazing **observe** ➔ observing

Ngoại trừ

dye ➔ dyeing **singe** ➔ singeing

- Động từ tận cùng là "ee" thì giữ nguyên "ee" rồi thêm "-ing"

agree ➔ agreeing

- Động từ kết thúc bằng một phụ âm và trước đó là một nguyên âm duy nhất thì gấp đôi phụ âm cuối trước khi thêm "-ing"

hit ➔ hitting **stop** ➔ stopping

- Động từ có hai âm tiết mà âm tiết thứ hai kết thúc bằng một phụ âm và trước đó là một nguyên âm, và trọng âm rơi vào âm tiết thứ hai thì gấp đôi phụ âm cuối trước khi thêm "-ing"

admit ➔ admitting
begin ➔ beginning
prefer ➔ preferring

Ngoại trừ những từ có trọng âm không ở âm tiết cuối:

budget ➔ budgeting
enter ➔ entering
signal ➔ signalling

- Động từ kết thúc bằng "ie" thì đổi "ie" thành "y" rồi thêm "-ing"

die ➔ dying **lie** ➔ lying

Ghi chú: Một số động từ không chia ở tiếp diễn

know	wish	expect
understand	wonder	notice
fall	smell	agree
keep	seem	love/like
be	fell	start /begin
want	need	look
see	consider	taste
hear	feel	finish
have to	prefer	stop
hope	sound	enjoy

C. PHONETICS

Stress in three-syllable words (Trọng âm của từ có 3 âm tiết)

1. Trọng âm rơi vào âm tiết đầu

*** Danh từ gồm 3 âm tiết nếu âm tiết cuối chứa:**

- nguyên âm ngắn
- và âm tiết thứ 2 chứa nguyên âm ngắn và (hoặc) kết thúc không quá một phụ âm.

Words	Pronunciation	Meaning
agency	/ˈeɪ.dʒən.si/	đại lí
company	/ˈkʌm.pə.ni/	công ty
conference	/ˈkɒn.fər.əns/	hội thảo
Germany	/ˈdʒɜː.mə.ni/	nước Đức
family	/ˈfæm.əl.i/	gia đình
industry	/ˈɪn.də.stri/	ngành công nghiệp
library	/ˈlaɪ.brər.i/	thư viện
pregnancy	/ˈpreg.nən.si/	sự mang thai
resident	/ˈrez.ɪ.dənt/	dân cư
restaurant	/ˈres.tər.ɒnt/	nhà hàng

*** Danh từ có 3 âm tiết nếu âm tiết cuối chứa:**

-1 nguyên âm dài
- hoặc 1 nguyên âm đôi
- hoặc kết thúc bằng hơn 1 phụ âm

Trần Trường Thành - Zalo 0369904425

Words	Pronunciation	Meaning
architect	/ˈɑː.kɪ.tekt/	kiến trúc sư
attitude	/ˈæt.ɪ.tʃuːd/	thái độ
consonant	/ˈkɒn.sə.nənt/	phụ âm
exercise	/ˈek.sə.saɪz/	bài tập
extrovert	/ˈek.strə.vɜːt/	người hướng ngoại
holiday	/ˈhɒl.ə.deɪ/	kì nghỉ
interview	/ˈɪn.tə.vjuː/	cuộc phỏng vấn
paradise	/ˈpær.ə.daɪs/	thiên đường
photograph	/ˈfəʊ.tə.grɑːf/	ảnh
radio	/ˈreɪ.di.əʊ/	đài radio

2. Trọng âm rơi vào âm tiết thứ hai

*** Động từ gồm 3 âm tiết nếu âm tiết cuối:**

- nguyên âm ngắn
- và kết thúc với không quá 1 phụ âm.

Words	Pronunciation	Meaning
consider	/kənˈsɪd.ər/	cân nhắc
deliver	/dɪˈlɪv.ər/	giao hàng
determine	/dɪˈtɜː.mɪn/	xác định, quyết định
develop	/dɪˈvel.əp/	phát triển
discover	/dɪˈskʌv.ər/	khám phá
encounter	/ɪnˈkaʊn.tər/	bắt gặp, chạm trán
examine	ɪgˈzæm.ɪn/	kiểm tra
establish	/ɪˈstæb.lɪʃ/	thiết lập
inhabit	/ɪnˈhæb.ɪt/	sống, ở (nơi nào đó)
remember	/rɪˈmem.bər/	nhớ

*** Danh từ gồm 3 âm tiết có**

- âm tiết cuối chứa 1 nguyên âm ngắn
- hoặc có âm tiết thứ 2 chứa nguyên âm dài/ nguyên âm đôi hay kết thúc bằng hơn 1 phụ âm

Words	Pronunciation	Meaning
advantage	/ədˈvɑːn.tɪdʒ/	sự thuận lợi
banana	/bəˈnɑː.nə/	quả chuối
computer	/kəmˈpjuː.tər/	máy vi tính
dioxide	/daɪˈɒk.saɪd/	dioxit (hóa học)
disaster	/dɪˈzɑː.stər/	tai họa, thảm họa
museum	/mjuːˈziː.əm/	bảo tàng
papyrus	/pəˈpaɪ.rəs/	cây cói, giấy cói
potato	/pəˈteɪ.təʊ/	khoai tây
tomato	/təˈmɑː.təʊ/	cà chua

3. Đối với các hậu tố

- Các hậu tố không ảnh hưởng đến trọng âm của từ gốc: -able, -age, -al, -en, -ful, -ing, -ish, -like, -less, -ness, -ly, -ment, -ous, -fy, -wise

Words	Pronunciation	Type	Meaning
amazing	/əˈmeɪ.zɪŋ/	adj	gây ngạc nhiên
beautiful	/ˈbjuː.tɪ.fəl/	adj	đẹp
childlike	/ˈtʃaɪld.laɪk/	adj	giống trẻ con

Trần Trường Thành - Zalo 0369904425

comfortable	/ˈkʌm.fə.tə.bəl/	adj	thoải mái
glorify	/ˈglɔː.rɪ.faɪ/	v	tuyên dương
happiness	/ˈhæp.i.nəs/	n	hạnh phúc
hurriedly	/ˈhʌr.id.li/	adv	một cách hối hả
humorous	/ˈhjuː.mə.rəs/	adj	hài hước, vui tính
lengthen	/ˈleŋ.θən/	v	kéo dài ra
marriage	/ˈmær.ɪdʒ/	n	sự kết hôn
otherwise	/ˈʌð.ə.waɪz/	adv	nếu không thì
powerless	/ˈpaʊə.ləs	adj	không có hiệu lực
punishment	/ˈpʌn.ɪʃ.mənt/	n	sự trừng phạt
refusal	/rɪˈfjuː.zəl/	n	sự từ chối
reliable	/rɪˈlaɪ.ə.bəl/	adj	đáng tin cậy

- Với các hậu tố: -ee, -eer, -ese, -nique khi các từ gốc kết hợp với các hậu tố này, trọng âm rơi vào chính các hậu tố đó

Words	Pronunciation	Type	Meaning
Chinese	/tʃaɪˈniːz/	n	người Trung Quốc
Vietnamese	/ˌvjet.nəˈmiːz/	n	người Việt Nam
Japanese	/ˌdʒæp.ənˈiːz/	n	người Nhật Bản
interviewee	/ˌɪn.tə.vjuˈiː/	n	người được phỏng vấn
refugee	/ˌref.juˈdʒiː/	n	người tị nạn
engineer	/ˌen.dʒɪˈnɪər/	n	kĩ sư
pioneer	/ˌpaɪəˈnɪər/	n	người tiên phong
volunteer	/ˌvɒl.ənˈtɪər/	n	tình nguyện viên
antique	/ænˈtiːk	adj	cổ xưa
unique	/juːˈniːk	adj	độc đáo
technique	/tekˈniːk/	n	kĩ thuật

- Với các hậu tố: - ous, -ial, -al, -ic, -ion, -ity khi các từ gốc kết hợp với các hậu tố này, trọng âm rơi vào âm liền trước hậu tố

Words	Pronunciation	Type	Meaning
accidental	/ˌæk.sɪˈden.təl	adj	tình cờ, ngẫu nhiên
memorial	/məˈmɔː.ri.əl/	adj	(thuộc) kỉ niệm
financial	/faɪˈnæn.ʃəl/ /fɪˈnæn.ʃəl/	adj	(thuộc) tài chính
advantageous	/ˌæd.vænˈteɪ.dʒəs/	adj	có lợi, thuận lợi
courteous	/ˈkɜː.ti.əs/	adj	lịch sự
ambitious	/æmˈbɪʃ.əs/	adj	có nhiều tham vọng
gracious	/ˈgreɪ.ʃəs/	adj	duyên dáng
dramatic	/drəˈmæt.ɪk/	adj	sâu sắc
climatic	/klaɪˈmæt.ɪk/	adj	thuộc về khí hậu
energetic	/ˌen.əˈdʒet.ɪk/	adj	hăng hái
explosion	/ɪkˈspləʊ.ʒən/	n	sự nổ
occasion	/əˈkeɪ.ʒən/	n	dịp
conclusion	/kənˈkluː.ʒən/	n	sự kết luận
ability	/əˈbɪl.ə.ti/	n	khả năng
publicity	/pʌbˈlɪs.ə.ti/	n	sự công khai
necessity	/nəˈses.ə.ti/	n	sự cần thiết

PART II: LANGUAGE

A Phonetic

Exercise 1. Put the words in the table ... their stress pattern.

illegal	celebrate	available	festival	consumption	electric
performance	performer	generate	effective	imagine	convenient
exhausted	comfortable	library	improvement	relative	fortunate

_____	_____
_____	_____
_____	_____
_____	_____
_____	_____
_____	_____

Exercise 2. Mark the stress of the words in the box then read them aloud.

Number 1 has been done for you as an example: re'member

1. remember	**7.** marriage	**13.** refugee	**19.** dramatic
2. attitude	**8.** occasion	**14.** inhabit	**20.** library
3. refusal	**9.** beautiful	**15.** reliable	**21.** happiness
4. company	**10.** publicity	**16.** Germany	**22.** necessity
5. ambitious	**11.** childlike	**17.** Chinese	**23.** restaurant
6. establish	**12.** consider	**18.** amazing	**24.** conclusion

Exercise 3. Choose the word which has a different stress pattern from the others. (Further practice)

1.	A. another	B. energy	C. example	D. develop
2.	A. afternoon	B. tomorrow	C. consider	D. pollution
3.	A. quality	B. suggestion	C. natural	D. yesterday
4.	A. vacation	B. abundant	C. disaster	D. traveling
5.	A. easily	B. Netherlands	C. countryside	D. convenient
6.	A. basketball	B. recycle	C. invasion	D. expensive
7.	A. holiday	B. plentiful	C. renewable	D. atmosphere
8.	A. happiness	B. gathering	C. violin	D. everyone
9.	A. family	B. difference	C. photograph	D. interesting
10.	A. opinion	B. volunteer	C. museum	D. comparison
11.	A. activity	B. biogas	C. exciting	D. conclusion
12.	A. carnival	B. powerful	C. envelop	D. waterfall
13.	A. collection	B. volleyball	C. negative	D. dangerous
14.	A. excursion	B. celebrate	C. valuable	D. motorbike
15.	A. unfortunate	B. advantage	C. ambition	D. limitation
16.	A. musician	B. enormous	C. natural	D. improvement
17.	A. effective	B. plentiful	C. dangerous	D. limited
18.	A. population	B. education	C. consumption	D. satisfaction
19.	A. energy	B. countryside	C. changeable	D. volunteer
20.	A. renewable	B. artificial	C. unfortunate	D. continuous
21.	A. different	B. serious	C. effective	D. regular
22.	A. dangerous	B. countryside	C. energy	D. volunteer
23.	A. incapable	B. sincere	C. loyalty	D. success

Trần Trường Thành - Zalo 0369904

24.	A. development	B. satisfaction	C. population	D. education
25.	A. attraction	B. humorous	C. acquaintance	D. unselfish
26.	A. excellent	B. marvelous	C. familiar	D. similar
27.	A. musician	B. scientist	C. energy	D. biogas
28.	A. abundant	B. wonderful	C. convenient	D. important
29.	A. excellent	B. dangerous	C. plentiful	D. polluting
30.	A. exercise	B. calendar	C. travelling	D. convenience

B Vocabulary & Grammar

Exercise 1. Complete the sentences with the suitable word from the box.

generate	**invested**	**avoid**	**reduce**	**converted**

1. Solar power can be _____ into electricity.
2. Fossil fuels can be used to _____ electricity or drive a big machinery.
3. Use electricity economically so that we can _____ our electricity bills.
4. We should _____ using cars or motorbikes for short trips.
5. Businesses have _____ more money in renewable energy in recent years.

Exercise 2. Complete the sentences with the words from the box.

energy	**protect**	**hydro**	**renewable**	**panels**	**environment**

1. The energy that comes from water is called _____ energy.
2. We can use solar _____ to power the appliances in our house.
3. Burning coal is polluting our _____
4. Scientists are developing new energy sources to the _____ environment.
5. We can't run out of _____ energy sources.
6. The government is reducing the use of nuclear _____ nowadays.

Exercise 3. Fill in the blanks with the words in the box.

nuclear	**wind**	**biogas**	**oil**
solar	**carbon dioxide**	**coal**	**hydropower**

1. _____
2. _____ is a gas breathed out by people and animals from the lungs.
3. _____ is often found in the ground that is produced by dead plants and that can be burned to produce heat, consisting mainly of methane. (CH_4)
4. _____ is energy that comes from the force of moving water.
5. _____ is flammable black hard rock, used as a fossil fuel.
6. _____, commonly known as petroleum, is the largest source of energy in the US.
7. To produce _____ energy, atoms are split apart, which releases energy.
8. _____ energy is produced from moving air with the help of large turbines.

Exercise 4. Complete the sentences with the words given.

panels	**energy**	**overheat**	**non-renewable**	**recycle**
available	**hydro energy**	**appliances**	**fossil fuels**	**recycle**

1. The _____
2. If the fan doesn't work, the engine could _____.
3. Solar _____ are put on the roofs to produce electricity.
4. We _____ all our cans and bottles.
5. The _____ farm will provide enough energy for 100,000 homes.
6. Batteries store _____ from the solar panels.
7. All countries are asked to reduce their use of _____ sources of energy.
8. We would like people use more renewable energy sources instead of _____.

Trần Trường Thành - Zalo 0369904425

9. We should use less gas, but increase the use of _____ and nuclear energy.
10. His new job is to make sure lights and electrical _____ are switched off when they are not used.

Exercise 5. Choose the correct words.
1. We should rely much more on **limited / expensive / alternative** sources of energy.
2. The river provides a **limited / plentiful/ polluting** supply of clean water to nearby villages - they don't worry about water supply any more.
3. The problem with fossil fuels is that they are not **non-renewable / renewable / dangerous.**
4. The public have more concerns about **water / nuclear / solar** energy because of waste and accidents.
5. He seems not to **run up / run away/ run out** of energy, so he can work for hours without stopping.
6. Strawberries are **plentiful / limited / renewable** and cheap in summer.
7. Our **harmful / available / nuclear** natural resources will run out soon.
8. Using green sources of energy can make the air **cheap / unlimited / clean.**
9. Solar energy seems to be **limited / unlimited / harmful** - we can rely on it for a very long time.
10. The air becomes worse because of **polluted / polluting/pollution** gases from that factory.

Exercise 6. Circle the correct word to complete the sentences.
1. **Solar / Hydro** energy is the energy that comes from the sun.
2. Some types of energy are **cheap / expensive** and hard to find.
3. We are **doing/ running** a project on energy sources.
4. Energy is the power that we use to provide us with light, heat, or **food / electricity**.
5. **Renewable / Non-renewable** energy sources come from the sun, wind, and water.
6. Oil, natural gas and **coal / water** are called fossil fuels.
7. France **produces / protects** a great deal of wine for export.
8. They won't invest in any company that **cleans / pollutes** the environment.
9. The engine is hotter and hotter. I think it is **overheating / overcooling**.
10. The **wind / nuclear** energy is produced when the nuclear of an atom is divided or joined to another nuclear.

Created by: Mr Thanh (0369904425)

Exercise 7. Choose the word or phrase (A, B, C or D) that best fits the blank space in each sentence.
1. _____ energy sources can be used to create energy, generate electricity, or drive big machinery but they are harmful to the environment.
A. Solar B. Non- renewable C. Wind D. Renewable
2. _____ energy is produced by collecting sunlight and converting it into electricity.
A. Solar B. Wind C. Hydro D. Nuclear
3. When energy comes from _____, we call it hydro energy.
A. nuclear B. wind C. sun D. water
4. The energy from the _____ is renewable because we can't use it all up.
A. Sun B. Gas C. Oil D. Coal
5. The sun and the wind are other _____ sources of energy.
A. alternative B. limited C. harmful D. polluted
6. Fossil fuels are _____energy sources.
A. solar B. renewable C. non- renewable D. wind
7. A non- renewable source of energy can be used to power machinery, but it also _____the environment.
A. cleans B. pollutes C. helps D. protects
8. We will use _____energy sources like wind and solar energy to solve the problem of pollution.
A. non- renewable B. renewable C. limited D. expensive
9. Hydro power is_____ because dams cannot be built in certain areas.
A. limited B. unlimited C. abundant D. dangerous
10. Coal, natural gas and oil are called _____.
A. solar energy B. fossil fuels C. biogas D. nuclear energy
11. The wind is a clean _____of energy.

Tran Truong Thanh Zalo 0369904425

A. root B. source C. origin D. strong

12. We are trying to replace _____ energy in our daily life.
A. renewable B. renew C. non-renew D. non-renewable

13. Nuclear energy is _____ but it can be very dangerous.
A. plentiful B. much C. large D. lots

14. Do not use more _____ than what we need.
A. wind B. food C. sunlight D. energy

15. People can convert solar power into _____
A. food B. electricity C. heat D. warmth

16. There are many _____ power plants in this area.
A. liquid B. land C. hydro D. water

17. Look! The train_____
A. come B. is coming C. am coming D. are coming

18. Can you be quieter? I _____to concentrate
A. am trying B. try C. is trying D. are trying

19. He _____a motorcycle to the centre now.
A. rides B. ride C. is riding D. are riding

20. We _____a project of science at present.
A. is doing B. are doing C. do D. does

21. Please don't make so much noise. The baby _____in the room.
A. sleep B. am sleeping C. is sleeping D. are sleeping

22. My classmates _____football in the playground at the moment.
A. am playing B. is playing C. playing D. are playing

23. The festival _____at 8:30 a.m.
A. starts B. is starting C. to start D. start

24. It's 10 o'clock now and I_____ a book.
A. are reading B. reads C. am reading D. is reading

25. Mary _____to lose weight because she _____very fat.
A. wants / is B. wants / is being C. want / are being D. want / be

26. When he _____in, I_____ in the kitchen.
A. comes / am cooking B. come / am cooking
C. is coming / am D. comes / are

27. They _____ research on new battery systems.
A. does B. are doing C. are do D. are

28. What _____ Kelvin doing? – He _____ at my desk.
A. do - does B. is - sits C. does - sits D. is – is sitting

29. We_____ a plan to reduce the use of water for the toilet.
A. need B. are need C. are needing D. needs

30. Scientists _____ a new vaccine against skin cancer.
A. develops B. are develop C. are developing D. developing

31. Renewable energy sources _____ in usage.
A. increase rapidly B. rapidly increase
C. rapidly are increasing D. are rapidly increasing

32. We _____ about how much our consumption of energy is.
A. talks B. talking C. are talking D. talked

33. Where_____? – I _____ my lessons in the study.
A. are you - am preparing B. you are – am preparing
C. are you - prepares D. you are - prepare

34. On my way home, I _____ to buy a bottle of fresh water.
A. stop usually B. usually stop C. am usually stopping D. am stopping usually

35. Why _____the company _____ for new sources of drinking water?
A. does - looking B. do - look C. is - looking D. is - looks

36. The changing lifestyle of modern man _____ our environment.
A. polluting B. is polluting C. don't pollute D. are polluting

37. Now we _____ for a cheap, clean and efficient energy source.
A. look B. are looking C. looks D. is looking

38. Now scientists _____ new energy sources to protect the environment.
A. develop B. develops C. is developing D. are developing

39. I _____ for a present but I can't find anything good.

Tran Truong Thanh - Zalo 0369904425

A. am look B. am looking C. look D. are looking

40. Do you want to play football? - Not now. I am _____dinner.

A. having B. have C. to have D. has

Exercise 8. Circle the correct option in brackets.

1. I (**is / am**) having breakfast with my family.
2. Hoa (**is / are**) going to the supermarket with her mother
3. We (**am / are**) playing football in the playground.
4. They are (**visit / visiting**) their grandmother.
5. It is not (**raining / rain**) now.
6. (**He / I / You**) is making cakes in the kitchen.
7. (**They/ She/ He**) are studying English in the classroom.
8. My friends (**are / is**) flying kites in the park.
9. The dancers are (**perform / performing**) a folk dance.
10. The children are (**watches / watching**) the music talent shows on TV.

Created by: Mr Thanh (0369904425)

Exercise 9. Write down what the people in the pictures are doing.

1. The teacher _____ on the board.

2. Jim and Suzy _____ to school now.

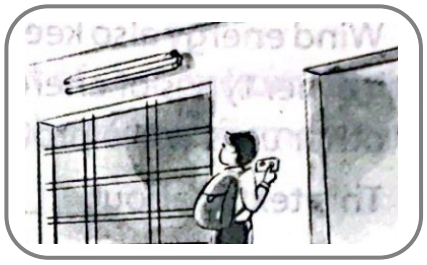

3. Anna _____ about wind energy.

4. They _____ football at the moment.

5. The man _____ a solar panel on the roof

6. Mai _____ the lights.

Exercise 10. Give the correct form of the given word to complete the sentences.

1. Tidal energy is renewable, _____, and clean.	(plenty)
2. Wind will be used as an _____ friendly source of energy.	(environment)
3. There are many ways will be used to solve the problem of _____.	(pollute)
4. Solar power can be used to _____ or cool our houses.	(hot)
5. _____, fossil fuels are harmful to the environment.	(fortunate)
6. We should use them _____ and try to find out alternative sources of power.	(economy)
7. Solar energy is _____, plentiful and clean.	(renew)
8. I think that solar energy can be an _____ source of energy in the near future.	(alter)
9. We should reduce the use of _____ at home.	(electrical)
10. It's a clean source of energy. Sailboats couldn't move without this _____.	(powerful)
11. Waves will be used as an _____ friendly source of energy.	(environment)
12. Limit car trips by relying on biking, walking, public _____.	(transport)
13. Solar power can be used to _____ or cool our houses.	(hot)
14. Energy is used to _____ a lot of electrical things.	(product)
15. There will be a _____ of energy in the near future.	(short)

Exercise 11. Fill in the blanks with the present continuous tense form of the verb.

1. Tom _____ to his father on the phone. (talk)
2. Laura _____ an email to her cousin. (write)
3. My friends _____ on the Internet. (chat)
4. I _____ my homework on the computer. (not do)
5. Peter and Paul _____ at the moment. (swim)
6. They _____ that English dictionary. (not use)
7. We _____ an interesting programme on TV. (watch)
8. You _____ to the radio. (not listen)
9. Lan _____ for her project on solar energy now. (prepare)
10. The supply of fossil fuels _____ out. (run)
11. Be careful! The car _____ so fast. (go)
12. Listen! Someone _____ in the next room. (cry)
13. _____ your brother _____ next to the beautiful girl over there at present? (sit)
14. Now they _____ to pass the examination. (try)
15. It's 12 o'clock, and my parents _____ lunch in the kitchen. (cook)
16. Keep silent! You _____ so loudly. (talk)
17. I _____ at home at the moment. (not stay)
18. Now she _____ to her mother about her bad marks. (lie)
19. At present, they _____ to New York. (travel)
20. He _____ in his office now. (not work)

Trần Trường Thành - Zalo 0369904425

PART III: SKILLS

A Listening

Exercise 1. Listen to the short talk [illegible] ch of the following questions.

1. What is pumped directly into the sea?
   A. raw sewage B. water C. garbage D. oil
2. What do ships drop into the sea?
   A. raw sewage B. water C. garbage D. oil
3. Where do oil spills come from?
   A. boats B. ships C. planes D. factories
4. Where are waste materials from?
   A. rivers B. seas C. schools D. factories

Exercise 2. Listen to the conversation twice and decide whether the following sentences are True or False.

Created by: Mr Thanh (0369904425)

No.	Statements	T	F
1.	Non-renewable sources are being used up.		
2.	Many poor people in developing countries have little electricity.		
3.	Biogas is a new source of energy available for poor people.		
4.	Biogas creates a lot of smoke.		
5.	The new energy source is not costly		

B Speaking

Exercise 1. Choose the correct response. Then practice the short exchanges in pairs.

1. **A:** Why didn't You turn off TV when you were away?
   B: a) I'll come back tomorrow.
   b) Sorry, I'll do it next time

2. **A:** Which source of energy will our homes rely on in the future?

3. **A:** Do you think wind energy is good?

4. **A:** Are you practising anything to save energy?

5. **A:** Why do we take showers instead of baths?

6. **A:** I have just changed to low energy light bulbs.

7. **A:** We should rely on fossil fuels.

8. **A:** Some people in the country use biogas.

9. **A:** Why do some nations stop using nuclear energy?

10. **A:** Why do we try to save energy?

B: a) I think we use much solar energy.
b) We rely on non-renewable as usual.
B: a) I don't think so. It's clean.
b) It's green energy, I think.
B: a) I ride to school every morning.
b) I use a lot of electric appliances.
B: a) It's more comfortable.
b) It can save water.
B: a) Good idea. Your carbon footprint will be bigger.
b) Great idea. It saves a lot of energy.
B: a) Yes. It's cheap and limited.
b) But they run out soon.
B: a) I think it's limited.
b) Good, it's clean and cheap.
B: a) Because it's sometimes dangerous.
b) Because it's abundant and renewable.
B: a) Because it's good for the environment.
b) Because we can rely on renewable energy.

Created by: Mr Thanh (0369904425)

Exercise 2. Complete the conversation with the questions from the box.

a. But does it cost a lot of money to build wind mills and wind turbines?
b. Does wind energy have any disadvantages?
c. Why do you think so?
d. Does it have any impacts on the land owners and farmers?
e. What type of energy do you think can be an alternative source of energy in the future?

Mai:
Lan:
Mai: (2) _____
Lan: Because we are running out of fossil fuels while the wind energy is abundant and unlimited.
Mai: I know it is also clean and safe to the environment. (3) _____
Lan: They can be expensive to install but the operating costs are quite low. Moreover, wind turbines can give energy to numerous homes.
Mai: (4) _____
Lan: Not at all. Land owners can make a great amount of money from renting the areas to install wind turbines. It doesn't take much space so farmers can even continue to work on the land.
Mai: (5) _____
Lan: Yes, it does. For example, wind turbines could be unsafe for wildlife and lead to noise and visual pollution. However, I think this source of energy has more benefits so it is growing rapidly in the world now.

Exercise 3. Reorder the sentences (A - L) to make a logical conversation.

_____ **A.** Hi, Nam. What are you doing?
_____ **B.** I'm preparing for my presentation on one type of renewable energy.
_____ **C.** Oh, I think solar energy doesn't have any disadvantages.
_____ **D.** I'm going to talk about Its source, its advantages and disadvantages.
_____ **E.** What type of energy do you choose for your presentation?
_____ **F.** Thank you.
_____ **G.** Sounds interesting. How many points are you going to present about solar energy?
_____ **H.** Yes, it does. It costs a lot of money to install a solar power system and it also uses a lot of space.
_____ **I.** I'm talking about solar energy.
_____ **J.** Not really. There are more and more people using solar energy now to produce electricity for their houses.
_____ **K.** I see. Do the disadvantages of solar energy overweigh the benefits?
_____ **L.** Thanks for your sharing, Nam. Good luck with your presentation.

Trần Trường Thành 0369904425

Exercise 1. Read the text and choose the correct answer (A, B, C or D).

Producing electricity from wind energy has many advantages. Firstly, it brings money into poor rural areas around the country. It creates thousands of jobs for the local people. Wind energy is an easy crop for farmers to sell. Farmers do not have to depend on water or sun to make money. Farmers can receive a lot of money from farm renting. Secondly, wind power does not produce pollutants, so the costs for health care also decrease. The American Lung Association is in favor of wind energy because it keeps the air clean and free from pollution. They also launch a Healthy Air Campaign to promote the use of wind energy.

Wind energy also keeps energy bills down for the users. It is becoming more competitive with other types of energy in terms of cost. Wind farms leave most of the farmer's land free for other uses while providing a steady income.

Created by: Mr Thanh (0369904425)

1. This text is ab
A. the disadvantages of wind energy
B. the benefits of wind energy
C. the production of wind energy
D. producing electricity

2. Wind energy helps the farmers_____.
A. get more jobs
B. grow more crops
C. earn less money
D. earn more money

3. Another advantage of wind power is _____.
A. clean and safe for health
B. reducing pollutants
C. cleaning the water
D. cleaning the air

4. The campaign of the American Lung Association aims at _____
A. advertising the wind turbines
B. supporting the growth of wind energy
C. cleaning the air
D. reducing pollutants

5. The prices of wind energy is _____.
A. increasing
B. decreasing
C. staying the same
D. reducing

Exercise 2. Read the passage, and choose the correct answer A, B, C, or D for each question.

Many people still believe that natural resources will never be used up. Actually, the world's energy resources are limited. Nobody knows exactly how much fuel is left. However, we also should use them economically and try to find out alternative sources of power. According to Professor Marvin Burnham of the New England Institute of technology, we have to start saving coal, oil, and gas before it is too late; and solar power is the only alternative.

However, many people do not approve of using nuclear power because it's very dangerous. What would happen if there was a serious nuclear accident? Radioactivity causes cancer and may badly affect future generations. The most effective thing is that we should use natural resources as economically as possible.

1. How much fuel is left?
A. there is a lot of fuel
B. Let's use it as much as we would like
C. No one knows exactly
D. It will never be used up

2. According to professor Marvin Burnham, _____.
A. solar power is the only alternative
B. we have to save coal, oil, and gas
C. A and B are incorrect
D. A and B are correct

3. Radioactivity from nuclear power_____.
A. alters a new kind of energy
B. is necessary to cure diseases
C. can have good effects on the future generations
D. causes cancer and has bad effects on the future generations

4. We should use coal, oil, and gas_____.
A. as much as possible
B. carelessly
C. as economically as possible
D. all are incorrect

5. According to the passage, using nuclear power is _____.
A. interesting
B. dangerous
C. safe
D. cheap

Exercise 3. Read the text, and choose the correct answers.

Cities Going Green

When many people move to cities, governments are looking for ways to make cities become better living places. They try to create more public parks that are both beautiful and green, but it seems to be difficult.

Some cities follow the idea of a green city as the goal. Masdar City in the United Arab Emirates (UAE) aim to become a **model** for other cities to follow. The city mostly uses renewable sources such as solar energy to provide all of its energy needs. Moreover, it will be a zero-waste city in which everything that is used can be recycled. Masdar City will also do an *experiment* for environmentally friendly ideas.

Trần Trường Thành - Zalo 0369904425

From energy consumption and waste disposal to green public transportation, the lesson to be learned from Masdar City is very important.

1. What is one way governments create better living places?
A. They provide more public parks.
B. They tell people to move.
C. They plan a beautiful and green city.
D. They throw away waste..

2. What makes Masdar City special?
A. It is much larger than other cities.
B. It is created by a computer.
C. It has more people in it than other cities
D. Its goal is to become a green city.

3. Which statement is true?
A. Masdar City does not recycle.
B. The lessons learned from Masdar City might be very valuable.
C. All green ideas must be forgotten.
D. To get its goal, Masdar City will stop allowing people in.

4. How is Masdar City going to do with garbage?
A. It is going to burn it.
B. It is going to bury it.
C. It is going to recycle it.
D. It is going to sell it.

5. What does the word "**model**" in paragraph 2 mean?
A. a small copy
B. a product
C. a good example to follow
D. a person in a fashion show

Exercise 4. Read the text and choose the correct option.

Alternative Energy Sources

A number of different energy sources are used every day. Where does this energy come from? Burning of fossil fuel is a main energy source. Sources other than fossil fuel are known as alternative energy sources and there are several of them being used every day.

The water used by whitewater rafters has a tremendous amount of energy. That water energy can be harnessed to perform work by using waterwheels. In a hydroelectric plant running or falling water spins a generator to creat electricity.

Not only does water spin a wheel, but wind can do so as well. Windmills work in the same manner as a waterwheel. Windmills are used as wind turbines that can generate electricity. As the wind propels the blades, energy is created and stored to be used to perform work. As long as there is movement, energy can be produced, and the wind is an excellent alternative energy source.

The internal heat of the earth is another energy source. The earth's internal heat is called geothermal energy. Geothermal energy can be used to heat homes and produce electricity.

Every day the sun provides energy. Solar energy is often thought to just be sunlight. Sunlight is full of energy. People are finding new ways to harness the power of sunlight. One major way is to trap or concentrate sunlight with the use of solar panels. This trapped sunlight can be used to heat homes and water. Also, solar cells are devices that convert sunlight into electric energy.

Fossil fuel is the most common source of energy today, but it is not considered clean energy. There are various other sources of alternative energy that must be incorporated if the next generations are expected to have energy. Water, wind, the internal heat of the earth, and the sun are all being harnessed to creat energy. Geothermal energy and solar energy are more common. Homes are being heated and cooled, cars are being driven, and electricity is used all from these various alternative sources of energy. All are examples of clean energy, which is better for the environment because it does not cause pollution.

1. Sources of energy other than fossil fuels are called which of the following?
A. Alternative sources of energy
B. Geothermal energy
C. Solar energy
D. Water energy

2. Water energy can be harnessed by using which of the following tools?
A. Windmills
B. Waterwheels
C. Aqua cells
D. Hydroelectric wheels

3. The earth's internal heat is called which of the following?
A. Solar energy
B. Core energy
C. Geothermal energy
D. Steam energy

4. Which of the following is a device that converts sunlight into electric energy?
A. Solar cells
B. Solar panels
C. Converters
D. Hydro panels

5. Which of the following is a tool used to trap or concentrate sunlight to be used for energy?
A. Solar cells
B. Solar panels
C. Solar devices
D. Solar censors

6. Which of the following is NOT an alternative source of energy?
A. Water
B. Wind
C. Sun
D. Plants

Exercise 5. Read the passage and write T (True) or F (False) next to the sentences.

Solar energy

Trần Trường Thành - Zalo 0369904425

Solar energy is the energy that we get from the sun and converted into thermal or electrical energy. Solar energy is a renewable energy because it will never end as long as the sun remains. Solar energy is also pollution-free because there will be no pollution occurring while producing solar energy. Solar energy is not only pollution-free energy but also its maintenance cost is very low, so to maintain a solar power plant, less manpower is required than others. Also, one can get a non-stop power supply even in the rainy season with the help of solar panels. However, there are also some disadvantages of using solar energy like the initial setup cost of panels and battery is very high. To store the solar energy in a large number, one needs a personal room for the batteries. It pollutes the environment chemically.

1. Solar energy is the energy that we get from the sun. _____
2. Solar energy is renewable and pollution-free energy. _____
3. Solar energy will end one day. _____
4. Maintaining a solar power plant requires a lot of manpower _____
5. One can get a non-stop power supply even in the rainy season with the help of solar panels. _____
6. One of the disadvantages of using solar energy is the very high initial setup cost. _____

Exercise 6. Read the text, and marks the sentences T (True) F (False)

Green Energy

Fossil fuels are used to generate most of the world's energy, and they are in different forms. For example, coal may be burned in a power plant to generate electricity, but gas is burned in a car's engine to make it run. Neither of these two sources is considered green energy because they produce a lot of pollution when burned.

When green energy is renewable, this means a person can replace the same amount of energy that was consumed by that person within that person's lifetime. While it took millions of years to create the fossil fuels that we now burn - fossil fuels are non-renewable.

Wind power and solar power are two excellent sources of green energy. Once the production of the necessary parts of wind turbines and solar panels has been complete, there is nearly no us hope for a cleaner and greener future.

1. Fossil fuels create pollution when they are used as an energy source. _____
2. Fossil fuels are finally going to run out. _____
3. Solar energy is not renewable. _____
4. Wind energy pollutes the environment terribly. _____
5. The sun and the wind are the top two sources of green energy. _____
6. For green energy sources, pollution is created when their parts are produced. _____
7. A non-green source of energy is polluting. _____
8. Green sources of energy will not make the air cleaner. _____

Exercise 7. Read the text, and do the following tasks.

Energy Answers

As the global demand for energy increases, countries all over the world are responding to threat of an energy crisis by developing renewable energy sources to replace fossil fuels. Here's that's happening:

Wind power in Turkey

Turkey already has more than a dozen wind farms – electrical generating Stations that are powered by the wind. The benefits of wind power are so great that the nation has set the aim of increasing wind generation 20 times in the next few years

Going solar in Saudi

Farasan Island, part of Saudi Arabia, is located 40 km offshore. In addition to being a protected area for wildlife, the island is also home to the kingdom's first solar-power generating plant. Making power from sunlight will save fossil fuels, and it doesn't create pollution from power generation.

Wave power in Australia

A company in Australi Created by: Mr Thanh (0369904425) generates electricity from the movement of ocean waves. Amazingly, the machinery that turns wave power into electricity is actually underwater, so it doesn't harm the beautiful view. The electricity is used to power a factory that takes the salt out of seawater and turns it into fresh water for drinking and agriculture.

Creating sustainable energy supplies around the world is a huge challenge, but with work already in progress, we're on our way

Task 1. Choose the correct answer.

The text is about _____.

A. building modern cities that don't use too much energy.
B. the increasing use of renewable energy around the world.
C. the problem of pollution caused by burning fossil fuels.

Task 2. Mark the sentences T (true) or F (false).

Trần Trường Thành - Zalo 0369904425

1. Countries around the world are trying to use more fossil fuels and less renewable energy. _____
2. Turkey produces no wind power now, but plans to start soon. _____
3. Turkey plans a huge increase in the use of wind energy. _____
4. The power plant on Farasan Island makes power from the sun. _____
5. One problem with solar power is that it produces a lot of pollution. _____
6. The power plant in Australia uses sea salt to produce electricity. _____
7. One problem with the Australian power plant is that local people think it's ugly. _____
8. Most of the world's energy production today is sustainable. _____

Exercise 8. Read the following passage and circle the letter A, B, C, or D to indicate the correct word or phrase that best fits each of the numbers blanks.

Are you looking for a cheap, clean, effective source of power that doesn't cause (1) _____ or waste natural resources? Look no further than solar energy from the (2) _____. At present, most of our electricity comes from the use of coal, gas, oil or nuclear power. This power could be provided by the Sun. One percent of the solar energy that reaches the Earth is enough to provide power for the total (3) _____. Many countries are already using solar energy. Solar panels are placed (4) _____ the roof of a house and the Sun's energy is used to heat water.

1.	A. pollute	B. pollutes	C. polluted	D. pollution
2.	A. Moon	B. Sun	C. Earth	D. Mars
3.	A. popular	B. population	C. world	D. Vietnam
4.	A. on	B. in	C. of	D. to

Exercise 9. Read the text and choose the correct answer (A, B, C or D) for each space.

Most of our energy comes from fossil fuels (1) _____ coal, oil, and natural gas. Although the supplies of these energy sources are plentiful, they are limited. The (2) _____ of coal and oil is also having very harmful impacts (3) _____ the environment. However, fossil fuels are not the only source of energy and burning fuel is not the only way to (4) _____ heat and motion. Renewable energy offers us a better way. Some energy sources are renewable because they are naturally available (5) _____ last forever. Some sources have enormous supply so human can never use them up. Moreover, renewable energy sources (6) _____ much smaller impacts on the environment than fossil and nuclear fuels. (7) _____ include solar energy, which comes from the sun and can be converted into electricity and heat. Wind, geothermal energy from inside the earth, biomass from plants, and hydropower from water are (8) _____ renewable sources of energy.

1.	A. include	B. such as	C. unlike	D. is
2.	A. burn	B. to burn	C. burns	D. burning
3.	A. at	B. of	C. on	D. in
4.	A. produce	B. save	C. reuse	D. recycle
5.	A. so	B. but	C. for	D. and
6.	A. are	B. had	C. have	D. has
7.	A. It	B. There	C. That	D. They
8.	A. also	B. only	C. last	D. then

Exercise 10. Read the following passage and choose the best option.

It's hard to imagine education without (1) _____. Without energy, people's ability to get a decent education is severely (2) _____. Education is acknowledged as a crucial factor in helping people escape (3) _____poverty. In communities without energy children are often forced out of school to help (4) _____cooking (5) _____or earn money. When they do go to school it has to be in (6) _____which restricts their hours especially as many children walk for hours to get there. When they arrive home to do their schoolwork, they have no (7) _____to study and all that greets them is darkness. Or they have to rely on kerosene to provide precious light, which is both expensive and dangerous; if a lamp is knocked over it can cause serious burns. Computers, radio or TV are important tools in the (8) _____education. A (9) _____of electricity restricts the (10) _____for children to further their education. And teachers don't want to work in communities where there are no lights, little equipment, no TVs, computers, or life after dark.

1.	A. like	B. energy	C. such as	D. similar
2.	A. approximately	B. expressively	C. affected	D. progressively
3.	A. from	B. pioneering	C. pioneering	D. pioneers
4.	A. custom	B. waiter	C. collect	D. pill
5.	A. tourists	B. materials	C. pilot	D. guess
6.	A. orbit	B. orbition	C. orbital	D. daylight

Trần Trường Thành - Zalo 0369904425

7.	A. light	B. designed	C. draw	D. painted
8.	A. equipment	B. tool	C. modern	D. furniture
9.	A. invitation	B. lack	C. space	D. aviation
10.	A. landscape	B. departures	C. islands	D. opportunity

D Writing

Created by: Mr Thanh (0369904425)

Exercise 1. Rearrange the words or phrases to make meaningful sentences.

1. is/ renewable/ Hydro power/ a/ of/ source/ because/ energy/ it/ from/ water/ comes

➔ _____

2. non-renewable/ fuels/ Fossil/ sources/ energy/ are

➔ _____

3. are/ We/ looking for/ sources of energy/ cheap, / clean/ and effective

➔ _____

4. will/ We/ solar energy/use/ solve/ to/ the problem/ of energy shortage

➔ _____

5. will/ They/ a/ build/ hydro power station/ next year/ in/ area/ this

➔ _____

6. about / She / is / types / talking / of/ energy sources / renewable/.

➔ _____

7. project / they / doing / Are / a/ protecting / on / environment /?

➔ _____

8. Does / wind / come / from / win? energy /?

➔ _____

9. going out / He / turns off / always / the lights / before /.

➔ _____

10. hydro energy / The / is / teacher / right now / teaching / about/ us/.

➔ _____

11. often / My father / water / other / uses / for / recycled / purposes.

➔ _____

12. use / Do / you / in / energy / your house? / solar

➔ _____

13. save / natural resources / You / reduce landfill / by / can / and / recycling.

➔ _____

14. water / Wind, / will be / and sun / the future. / of / the energy

➔ _____

15. your house / generates C02. / Heating / with coal / gas / or

➔ _____

Exercise 2. Write complete sentences using the guided words and phrases. Add or make any changes if necessary.

1. I / think / people / should / turn / biomass / for energy.

➔ _____

2. This type / energy / renewable / and abundant.

➔ _____

3. We / can / use / crop / garbage / manure / as / source of / biomass.

➔ _____

4. These / source / available / everywhere / the world / so / it / easy / produce / biomass energy.

➔ _____

5. In this way / you / reduce / landfill / and / turn / waste / energy.

➔ _____

6. Moreover / biomass energy / cheap / and / cost / much less / coal / or oil.

➔ _____

7. You / can spend / less / light / or heat / your house / by / use biomass.

➔ _____

8. John / use / low energy light bulbs / save electricity /.

➔ _____

Tran Truong Thanh - Zalo 0369904425

9. She / not swim / the swimming pool / at the moment /.

➔ _____

10. Scientist / look for / a new energy source/ replace coal / now.

➔ _____

Exercise 3. Use the cues given to write correct sentences.

1. Almost all our energy/ come/ oil/ gas/ natural gas.

➔ _____

2. The earth's fossil fuels/ running out.

➔ _____

3. Scientists/try/find/other alternative sources/energy.

➔ _____

4. We/ use energy/ the sun, the wind, and the water.

➔ _____

5. The sun/ supply/ all the energy/ used/ grow plants.

➔ _____

6. If we/ able/ collect solar energy/we/ be sure/ have enough power.

➔ _____

7. Energy/ wind/ use/ centuries/ move ships, and pump water.

➔ _____

8. Recently/ wind/ use / generate electricity.

➔ _____

9. For a long time/ people/ use water/ power machines.

➔ _____

10. Today, / water power/ mostly/ use/ generate electricity.

➔ _____

Exercise 4. Write a paragraph about how to save energy at home, using the prompts below. You can use: should (not), and first, then, next, besides that, another way, finally...

How to save energy at home

- turn off the lights when leaving a room
- use LED lights because they are more efficient than halogen bulbs
- replace some appliances like dryers and refrigerators with better efficient models can cut the electricity bill by half
- unplug devices when not in use. Do not leave devices on standby to save the bill
- reduce water usage and electricity by taking quick showers
- use solar-powered electronic devices.

How to Save Energy at Home

_____

_____

_____

_____

_____

_____

_____

_____

Exercise 5. Use the notes to write a paragraph about how to save energy at home.

- turn off the lights when you leave a room
- switch to energy-saving light bulbs, such as LEDs
- upgrade old appliances: replace old devices because they consume a lot of energy
- use smart technology: it can turn lights on and off, turn the heating on an hour before you get home

_____

_____

Tran Truong Thanh - Zalo 0369904425

_____

_____

_____

_____

_____

_____

Exercise 6. Write a paragraph about how to save energy at home, using the prompts below. You can use: should (not), and first, then, next, besides that, another way, finally...

How can I save more energy at home?

- make sure your dishwasher is full before you use it
- use the eco-mode of any appliance
- make sure your washing machine is full and set to a cool setting
- turn off your outside lights at night
- turn off your air-conditioner when you are not in the room
- don't leave lights on during the day

How Can I Save More Energy at Home?

_____

_____

_____

_____

_____

_____

_____

_____

--- THE END ---

Tran Truong Thanh - Zalo 0369904425
